## Never back down 2008 movie free

Warner Bros. The 1960s were an era of cultural transformation, and the films of the time had significant effects on world culture. Established directors such as Hitchcock and Billy Wilder have published some of their best works, while new filmmakers such as Stanley Kubrick have begun to build their careers throughout the decade. In addition, independent cinema has begun to make major inroads into the general public. The following list is made up of the most important (but not necessarily the best) films released in the 1960s. Films are listed in chronological order according to the release date. After releasing a hit classic film in the 1950s, filmmaker Billy Wilder began the 1960s with another groundbreaking comedy: *The Apartment*. Jack Lemmon plays C.C. Baxter, an employee of a large company that allows his bosses to use his apartment to engage in extramarital affairs. Baxter falls in love with an elevator operator (Shirley Maclaine), but learns that she is the target of the affection of one of her bosses. The comedy deals frankly with the issue of infidelity, which had once been a taboo subject in Hollywood. *The Apartment* won five Oscars, including Best Picture. Wilder, Lemmon and Maclaine later reunited for *Irma la Douce* in 1964. Paramount Pictures Alfred Hitchcock was one of the leading star directors during this period. With *Psycho*, Hitchcock reduces his usual big budgets, opting instead for a small-scale black-and-white film. *Psycho* tells the story of a murder in a motel in a small town and the shocking discoveries resulting from the investigation. *Psycho* and its famous shower scene would continue to inspire the style and tone of the film genre slasher with its mixture of violence, disturbing behavior and sexuality. *West Side Story* transposed Shakespeare's *Romeo and Juliet* to contemporary New York. The film version is considered by critics to be one of the best film adaptations of a hit Broadway musical. He examined the racial dynamics of American cities, depicting a white gang and a Puerto Rican gang fighting over in a blood feud. *West Side Story* was a box office success and won 10 Oscars. The songs, especially *Somewhere (There's a Place for Us)*, *America* and *Tonight*, are among the most popular in the history of musical theatre and American cinema. Bond. James Bond. British super spy James Bond, one of the most iconic movie heroes, made his very first film appearance in 1962 *Dr. No*. Sean Connery stars as Bond, taking on the villainous title character (Joseph Wiseman) while romanticizing Honey Ryder (Ursula Andress). *Dr. No* was a huge success that continued to inspire a franchise long-term. Although better Bond films would come later in the 1960s, such as *From Russia with Love* (1963) and *Goldfinger* (1964) — *Dr. No* is the blockbuster that triggered it all. Over 55 years and 24 sequels later, Bond continues to thrive on screen. The 1960s were a defining decade for international cinema. Italian cinema, in particular, flourished over the decade. The Time The famous Italian director Federico Fellini has released his masterpiece *8 1/2* as a reflection of a filmmaker facing a creative block and a midlife crisis, and the emotional fallout he faces. This surreal introspective film inspired many filmmakers, including Woody Allen and Terry Gilliam, and was adapted into a musical *Nine* in 2009. *8 1/2* won the Oscar for Best Foreign Language Film. It was Fellini's third Oscar. Columbia Pictures considered by critics as the best black comedy ever made, *Dr. Strangelove or: How I learned to stop worrying and love the bomb* exploited in America's very real fear of nuclear war. Director Stanley Kubrick started the project as a serious thriller adapted from the novel *Red Alert*, but the film evolved into a comedy during the script process. British comedian Peter Sellers plays three roles, including that of the President of the United States, who faces a crisis when an Air Force general is behind a nuclear attack on the Soviet Union. Sellers also plays the title character, an eccentric scientist. The hilarious sending of government ineptitude and international politics remains a popular satire. After taking the world by storm with their music, the Beatles made their first film, *A Hard Day's Night*, in 1964. The Fab Four demonstrated a remarkable talent for comedy in the film, which was a huge success and influential. *A Hard Day's Night* has demonstrated the cultural power of rock and roll, which will only grow until the end of the decade. It also served as the inspiration for future video clips. Few films have been as influential as *The Good, the Bad and the Ugly*, one of the greatest westerns ever made. Italian filmmaker Sergio Leone has turned spaghetti Western into art with his *Dollar Trilogy*, a trio of acclaimed westerns starring American actor Clint Eastwood. In *The Good, the Bad, and the Ugly*, Eastwood plays one of three men in search of Confederate gold buried in a growing battle of spirits. The film is known for its amazing cinematography and beloved music by Ennio Morricone. *Bonnie and Clyde*, which stars Faye Dunaway and Warren Beatty in the title role, was one of the first films to challenge criminals since the 1930s. Director Arthur Penn pushed the boundaries with the film's depiction of violence and sex. Warner Brothers feared that these creative choices would sink the film, but *Bonnie and Clyde* eventually became a huge success. The filmmakers followed the example of *Bonnie and Clyde*'s depiction of violence. The film is considered a precursor to the New Hollywood era of the 1970s. In the *Heat of the Night* was one of the first Hollywood films play the role of African-American hero. Sidney Poitier stars as Virgil Tibbs, a Philadelphia detective who is arrested in Mississippi as a murder suspect and eventually works on the case. The film, which examines racial prejudice, felt revealing when it was released human rights movement in the United States. In 1967, Poitier also starred in two other hits: *To Sir, with Love* and *Guess Who's Coming to Dinner*. In the *Heat of the Night* won five Oscars, including Best Picture. Two sequels with Poitier followed. Comedian Mel Brooks made his director's debut with *The Producers*, a comic film about a washed Broadway producer (Zero Mostel) and an accountant (Gene Wilder) who create a scheme to make money from a musical that is sure to close. The terrible result, a terrible musical in a musical called *Springtime for Hitler*, is one of the most memorable moments in Hollywood history. Nearly 35 years after the film's release, Brooks co-wrote a musical adaptation of *The Producers*, which was a huge success. The sci-fi classic *Planet of the Apes* depicts an astronaut (Charlton Heston) landing on a planet ruled by evolved monkeys that enslave humans. The arrival of the astronaut threatens to upset the society of monkeys. *Planet of the Apes* has received great success for its makeup effects, social commentary, and, most importantly, its shocking twist ending. It was followed by four sequels, a television series, and a series of cartoons. Other *Planet of the Apes* films followed in the 21st century. Four years after *Dr. Strangelove*, filmmaker Stanley Kubrick returns with the equally ambitious 2001: *A Space Odyssey*. The segments of the film trace human history, from the opening sequence dawn of man to the year 2001. The episodic narrative leaves much of the film open to interpretation. 2001 won the Oscar for Best Visual Effects and is considered a historical film in the field of special effects. Today's zombie movies and TV shows come from perhaps the greatest horror film ever made: *Night of the Living Dead*. This independent horror feature has inspired countless horror film filmmakers, and its realistic gory imagery has created controversy with the public. Director George A. Romero said he threw Duane Jones, an African-American actor, into the lead role simply because he had the best audition. However, critics suggested that the casting was a sign that the film was an allegory for racism and the Civil Rights Movement. Whatever the original intention, *Night of the Living Dead* is now considered a game-changing film. Romero directed five sequels from 1978 to 2009. Countless imitators followed, including the popular television series *The Walking Dead*. *Easy Rider* has demonstrated a new style of realism in cinema. In this low-budget road movie, Dennis Hopper and Peter Fonda play two drug-trafficking bikers traveling across the United States. After an extremely positive reception from Cannes 1969, *Easy Rider* became a major hit in the United States. The soundtrack, which featured Steppenwolf, The Band and Jimi Hendrix, was equally popular. *Easy Rider* marked a movement towards independent cinema and the New Hollywood era of the 1970s. 1970.
